Web Developer | E-Commerce Specialist | Digital Marketing & Automation

+91 937 051 6798 | afnanisane2@gmail.com | At Post: Vahoor, Tal: Mahad, Raigad – 402301

PROFESSIONAL SUMMARY

Results-driven Web Developer and Digital Marketing Specialist with over 4 years of professional experience across e-commerce development, marketing automation, social media management, and front-end engineering. Adept at building highly functional, visually appealing websites on Shopify, WordPress, GoHighLevel, Wix, Squarespace, and Hostinger. Experienced in designing and deploying full marketing funnels and CRM automations, managing client online presence, creating professional video content, and executing SEO/SMO strategies. Combines technical proficiency with a creative eye to deliver end-to-end digital solutions that achieve measurable business outcomes.

PROFESSIONAL EXPERIENCE

Web Developer | Tasks Expert Virtual Employee Service Pvt Ltd

May 2025 – Feb 2026

Worked as a Web Developer managing multi-platform digital projects for diverse clients across industries.

- ▶ Developed and launched websites on Shopify, WordPress, GoHighLevel, Wix, Squarespace, and Hostinger Website Builder based on client requirements and brand guidelines
- ▶ Built and deployed marketing funnels and CRM automations using GoHighLevel for lead capture, follow-up sequences, appointment booking, and sales pipelines
- ▶ Managed end-to-end social media accounts including content planning, post creation, scheduling, and engagement monitoring across Facebook, Instagram, and LinkedIn
- ▶ Handled online presence management — maintaining NAP consistency, Google Business profiles, and reputation monitoring for multiple clients
- ▶ Designed and created social media post creatives, promotional banners, and ad graphics using Canva and Photoshop
- ▶ Produced and delivered professional video editing projects using Adobe Premiere Pro and After Effects, including promotional videos, reels, and branded intros
- ▶ Built custom-coded websites and landing pages using HTML, CSS, JavaScript for clients requiring bespoke solutions beyond CMS limitations
- ▶ Managed e-commerce stores including product uploads, collections setup, payment gateway integrations, and order management on Shopify
- ▶ Implemented SEO on-page optimizations including meta tags, keyword targeting, URL structuring, and page speed improvements
- ▶ Collaborated directly with international clients to gather requirements, present work-in-progress updates, and deliver polished final products
- ▶ Troubleshooted technical issues across platforms ensuring website uptime, responsiveness, and cross-browser compatibility

Front-End Developer | ISEES Technologies LLP

2022 – April 2025

- ▶ Designed and developed responsive, user-centric web applications from Figma mockups using HTML5, CSS3, JavaScript, and React.js
- ▶ Built and customized WordPress themes from scratch, aligned with client branding and functional requirements
- ▶ Integrated SEO best practices — meta tags, structured data, canonical tags, internal linking — across WordPress projects
- ▶ Ensured cross-browser and cross-device compatibility through rigorous testing on Chrome, Firefox, Safari, and mobile environments
- ▶ Optimized front-end performance through image compression, lazy loading, and code minification
- ▶ Collaborated with UX designers and back-end developers in Agile sprints to deliver feature-rich web applications

Database Administrator | ISEES Technologies LLP

2021 – 2022

- ▶ Designed, created, and maintained relational MS-SQL databases for business applications
- ▶ Performed database performance tuning via query optimization, indexing strategies, and execution plan reviews

- Created Views, stored procedures, and triggers to support application reporting and workflow logic
- Resolved database malfunctions, managed user permissions, and ensured data integrity and backup schedules
- Supported developers with data extraction, ETL requirements, and schema modifications per project needs

KEY PROJECTS

NAS – Number Accounting System | Domain: Accounting System

- Developed front-end for a comprehensive accounting SaaS platform featuring invoicing, expense tracking, tax management, and financial reporting
- Translated Figma design mockups into interactive React.js components with full responsiveness and cross-browser support
- Implemented performance optimizations for fast load times and scalability across user segments

SAAS-Based Online Accounting System | Role: Developer

- Managed and structured databases including table creation, Views, and complex SQL queries for data extraction and reporting
- Optimized slow queries using indexing and query refactoring to improve system performance significantly
- Coordinated with development team to implement schema changes and data modifications per sprint requirements

Academic Project: Battlefield (Game Development) | B.Tech Final Year Project

- Designed and developed a browser-based game as the final year B.Tech project using front-end technologies
